

LevMix mobile mixing unit

For optimally mixed fillers and leveling compounds

Mixing and transporting in one operation

- For self-leveling fillers and leveling compounds, ideal for floor and tile layers
- Highly effective mixing paddle prevents the formation of lumps; all the material is thoroughly mixed; no collection of material on the bottom
- Quick and practical to handle; is always where you want to use it
- Short mixing times, high yield, up to 50 % less time required than for manual mixing
- Robust, compact and maneuverable; 4 fully movable wheels; secure in upright position
- No need to transfer material into transport tubs
- Highly economical
- Easy to clean

Technical data: LevMix

Size of mixing tub:	75 liters
Capacity:	Max. 55 liters or 3 bags
Power rating of mixer:	1,6 kW / 230 V
Speed of mixing tool:	410 rpm
Dimensions (cm):	72 x 52 x 117 cm
Weight:	42 kg
